

# THE HIDDEN DANGER: FENTANYL-LACED MARIJUANA

What you don't know  
**CAN** be deadly.

**FACING  
FENTANYL**

**YOU MAY NOT KNOW  
WHAT YOU'RE USING**

Marijuana can  
be contaminated.

Fentanyl can't be  
seen or tasted.

Even small  
amounts can be  
deadly.

## WHAT IS FENTANYL?

- Extremely powerful opioid
- As little as 2 mg can be fatal
- Often mixed into street drugs
- Odorless, tasteless, and invisible

## FACT CHECK: FENTANYL-LACED MARIJUANA

- ✓ Some believe fentanyl burns away when smoked — but that is not true.
- ✓ Real cases show people have died after using marijuana contaminated with fentanyl.
- ✓ Exposure can happen even in small amounts.

**FENTANYL DOESN'T  
GIVE A SECOND CHANCE.**

## HOW IT ENDS UP IN MARIJUANA

- Cross-contamination during growing, harvesting, or handling.
- Intentional mixing (rare, but possible) to increase potency or create dependence.
- No safety testing—illegal markets have no quality control.

## RISKS OF FENTANYL-LACED MARIJUANA

- Poisoning and death
- Unexpected breathing problems
- Fast onset—little time to react
- Increased risk for first-time users or people with low opioid tolerance
